STATEMENT OF SUBSTANCE OF EXAMINER INTERVIEW

Sir:

This is filed in response to the Interview Summary mailed on February 3, 2004.

Applicants thank Examiner Brian Whiteman for the courtesy of a telephonic interview with the undersigned attorney on January 6, 2004, the substance of which is summarized below.

In the interview, Applicants' representative asked the examiner to reconsider Applicants' position that the cited art does not anticipate the instant claims. Specifically, Applicant requested reconsideration of the cited article by Alfonzo et al. as art because it does not meet all the limitations of the instant claims, including the limitation of the claimed oligoribonucleotide's being complementary to a mammalian target gene.

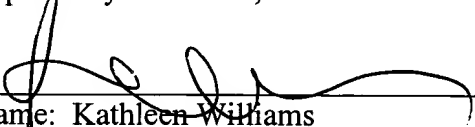

Applicant also requested reconsideration of the cited patent by Kmiec et al. on the grounds that Kmiec et al does not teach an oligoribonucleotide comprising two separate strands, nor does Kmiec et al teach an oligoribonucleotide which comprises linked strands which are self complementary AND fully complementary to the target gene. At the end of the discussion, the

examiner agreed to consider if the prior art rejections of record would be obviated by an amendment in which the independent claims were amended to recite an isolated oligoribonucleotide consisting of two separate RNA strands that are self-complementary and fully complementary to the target gene.

It is believed that no fees are due. However, if overlooked, the Commissioner for Patents is hereby authorized to charge all fees in the total amount to Deposit Account 16-0085, Reference No. 20200/2092.

Respectfully submitted,
